(54) Title: METHOD AND SYSTEM FOR MANAGEMENT OF ROAMING MOBILE SUBSCRIBER

(57) Abstract: In the method of the invention for the management of roaming of mobile subscribers, which are roaming between a home network and foreign networks, the roaming behavior is based on the contents of control files saved in the mobile equipment of the subscribers. A list of networks to be used in a priority order in a roaming situation is defined in said control files. When a subscriber is roaming management application, which checks the current roaming setting for the subscriber and the desired roaming behavior for the location that the subscriber roamed into, and as a result of the comparison, when necessary, it adjusts the roaming setting to be in accordance with said desired roaming behavior.
